SureView Announces Successful Integration of Luxrite DVR

Swansea, UK, June 1, 2011 - SureView Systems announce the successful integration of Luxrite Vectus DVR range into Immix®, the company's video based automation software.

Immix® delivers an operator intuitive platform for manage video surveillance / CCTV, intrusion and fire alarms, access control, and VoIP audio.

Central stations can now leverage the flexibility and power of the Luxrite Vectus DVR range for remote monitoring within Immix® through a seamless integration that offers high quality live video, full Pan Tilt Zoom and preset control, remote relay control, two-way audio and remote alarm notification with video alarm loops.

“The integration with the Luxrite Vectus DVR into SureView Immix® emphasizes our commitment to providing world class remote video solutions”, commented Craig Evans, Managing Director of SureView UK. “The Luxrite Vectus is an excellent performing DVR and supports all the features required by leading central stations. The DVR is provided and supported by a leading independent distributor that truly understands the remote monitoring market.”

About SureView Systems

SureView Systems owns, develops, sells and supports the Immix product line. Immix Enterprise and Cloud are video centric software platforms designed to receive alarm events from video, video analytics, access control, automation systems and GPS location aware devices, providing a single point of control. The products are UL Certified in the USA and BS8418 compliant in Europe. For more information please visit www.SureViewSystems.com
